

## DERMAPEN:

The Dermapen™ is a revolutionary micro-needling device which aims to tighten, lift and rejuvenate skin. The Dermapen™ can visibly improve the appearance of:

- Fine lines
- Wrinkles
- Surgical, acne and trauma scars
- Stretch marks
- Pigmentation
- ...and much much more!

Dermapen™ is a high speed, vibrating device that uses multiple micro needles that pierce the skin creating “controlled damage” on the surface of the skin with minimal pain compared to the traditional Dermaroller rejuvenation. The concept of skin needling is based on the skin’s ability to repair itself whenever it encounters physical damage such as cuts, abrasions and other physical trauma.

Skin needling procedures are performed in a safe and precise manner with the use of the sterile Dermapen needle head. Before the procedure commences a topical anaesthetic or local block is applied to the client’s skin to ensure a virtually painless experience.

- Rejuvenation – 4-6 treatments
- Acne Scarring – 6 treatments every 6 weeks apart
- Stretch marks – 4-8 treatments every 4-6 weeks apart
- Best Results – after the first treatment but your skin will continue to improve over the next 6-12 months after a course of treatments
- Downtime – you may experience facial redness for 12-48 hours after the treatment.
