

“I work out but it still doesn't tighten up the areas that I am concerned about. With VelaShape, I am able to target these areas. I noticed that the flank area went down significantly. I was really impressed! The treatment feels like a warm massage, so there is no pain. I absolutely believe it has been worth the money.”

# Treat Yourself To a Smoother, Sexier Figure

VelaShape™ contours, shapes and slims the body by improving cellulite and reducing circumference in as few as 4 treatment sessions. VelaShape provides dramatic results without downtime or significant discomfort.

The secret behind VelaShape is that it is the first and only technology that combines elōs with vacuum and tissue manipulation to reduce the volume and appearance of fat tissues.

## How quickly will I notice a change?

Gradual improvement of the treated area can be seen following the first treatment – with the skin surface of the treated area feeling smoother and firmer. Results in body contouring is seen from the first to second session and cellulite improvement is noticed in as few as 4 sessions.

## How many centimeters can I reduce from my circumference?

In clinical studies, patients report an average reduction of 2.5 centimeters post treatment. A recent study of post-partum patients showed up to 7cm reduction with 97% patient satisfaction.

## Is treatment safe?

Treatment is safe and effective for all skin types and colors. There are no reported short or long-term health effects.

## Does it hurt?

Most patients find VelaShape comfortable – like a warm deep tissue massage. The treatment is designed to accommodate your sensitivity and comfort level. It is normal to experience a warm sensation for a few hours post treatment. Your skin may also appear red for several hours.

## Are results permanent?

Following your complete treatment regimen, it is recommended to get maintenance treatments periodically. Like all non-surgical or surgical techniques, results will last longer if you follow a balanced diet and exercise regularly.
